Handover certificate for building

To whom it May Concern,

In the period from to 2025, through the combined efforts of the National Mine Action Center (NMAC) and UNMAS, and in cooperation with, a comprehensive and robust building surge, along with a thorough review of all relevant information, was conducted to assess the presence of Explosive Ordnance (EO) contamination in, Khartoum State.

Following the completion of survey and clearance operations, no (EO) remains in the building, and no further evidence of EO has been found.

We the undersigned hereby declare that to the best of our knowledge there are no further “known” EO in the building and it may be declared “EO free”.
